

PRESS RELEASE

Latour publishes a green bond framework in accordance with the EU taxonomy and the proposed European Green Bond Standard

Investment AB Latour has established a framework for green financing in accordance with the EU taxonomy and the proposed European Green Bond Standard. The framework sets the conditions for which assets and projects can be financed through green financing and further strengthens Latour's overall sustainability ambitions.

"Sustainability is integrated in all parts of Latour and to enable green financing is a natural development of our clear sustainability focus and ambitions to drive the development further", says Johan Hjertonsson, President and CEO of Latour.

To ensure that the framework meet the high sustainability requirements, the independent research institute Cicero Shades of Green has reviewed the framework and rated it Medium Green. The review of governance and reporting has received the highest rating "Excellent".

Latour's Green Bond Framework as well as the Second Opinion is available on <https://www.latour.se/en/green-financing>.
